Precipitation probability					
40%	50%	50%	50%	30%	10%

Forecast for Wednesday 29 May 2024

Weather: Scattered showers becoming more frequent and heavier through the morning and into the afternoon. However, there will also be sunny spells in-between. Showers will tend to weaken and become more isolated into the evening.

Chance of cloud-free hill tops above 800m: 40% improving to 90% during the afternoon, 70% by late evening.

Low Cloud and visibility: Areas of cloud above 500-600m at first, occasionally covering summits. However, bases lifting largely above summits into the afternoon, although some brief reductions possible in any heavier showers. Occasional areas of cloud above 700m from late evening. Generally good or very good visibility outside showers, with brief reductions in to moderate visibility showers, poor in cloud.

Valley	11/9	12/9	12/10	13/11	13/11	12/11	11/9
Freezing Level*	2000m	1900m	2000m	1900m	2000m	1900m	1800m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

High UV levels will carry a risk of sunburn in any longer sunny spells with sun protection advised.

Forecast for Thursday 30 May 2024

Weather: Occasional heavy showers spreading south through the first part of the day, perhaps thundery and with a chance of lightning/hail. Occasional showers continue into the afternoon, but should gradually become lighter and more isolated into the evening, with some sunny spells.

Maximum wind: Northwest 20-25 mph gusts 35 mph.

Chance of cloud-free hill tops above 800m: 40% improving to 80%.

Low Cloud and visibility: Areas of cloud above 400-600m at first, occasionally covering summits. However, bases lifting largely above summits into the afternoon, although some temporary reductions likely in any heavier showers. Generally good or very good visibility outside showers, with temporary reductions to moderate visibility in showers and poor in cloud.

Temperature: **Valleys:** Plus 10 Celsius, rising to Plus 16 Celsius.
At 800m: Plus 7 Celsius rising to Plus 10 Celsius
Freezing level: Above summits.
